

The creative process is intended to be followed in a flexible, fluid, and cyclical manner. As students and teachers become increasingly familiar with the creative process, they are able to move deliberately and consciously between the stages and to vary their order as appropriate. For example, students may benefit from exploring and experimenting before planning and focusing; or in some instances, the process may begin with reflecting. Feedback and reflection can happen throughout the process.

The Creative Process

The creative process will sometimes take students through the complete cycle, beginning with a contextualized challenge or inspiration and resulting in a final product to be evaluated and/or reflected upon. At other times, the process may only be followed through to the exploration and experimentation phase. Research clearly shows that the exploration and experimentation phase is a critical phase in the creative process. Students should be encouraged to experiment with a wide range of materials, tools, techniques, and conventions and should be given numerous opportunities to explore and manipulate the elements within each art form.
